

## a Inputs and evidence contract

### Clinical anchor

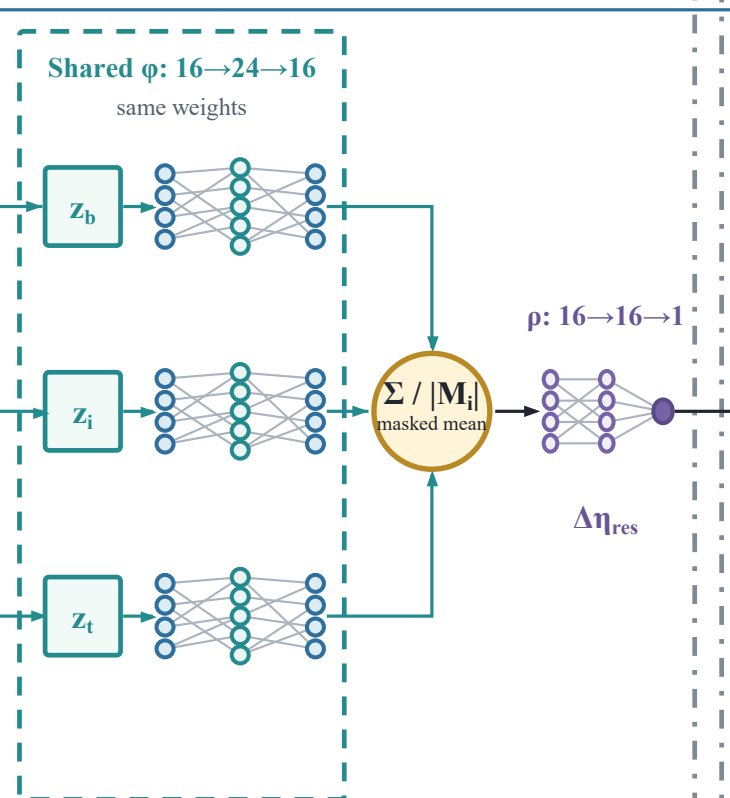

### Optional modalities

Each token also receives  
modality ID + status + quality

## b Permutation-invariant residual

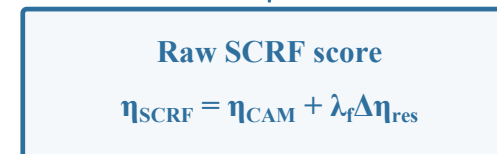

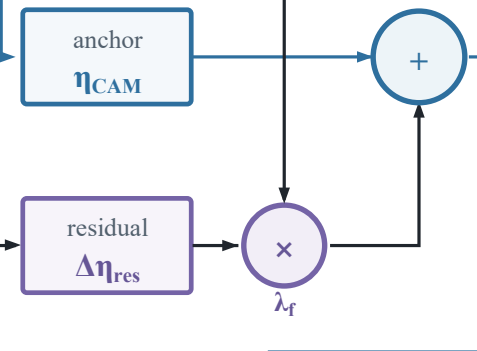

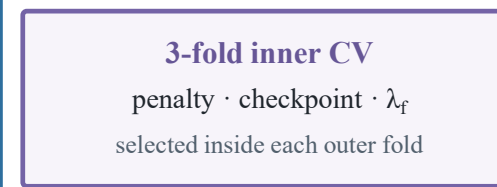

$|M_i| = 0$

$\Delta\eta = 0$

Deep Sets · 3,225 parameters

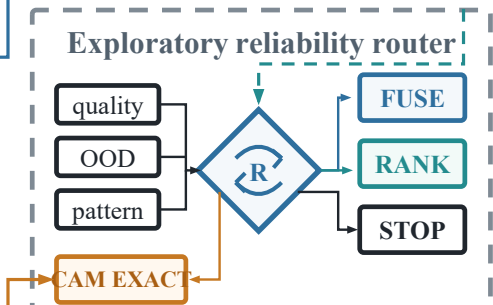

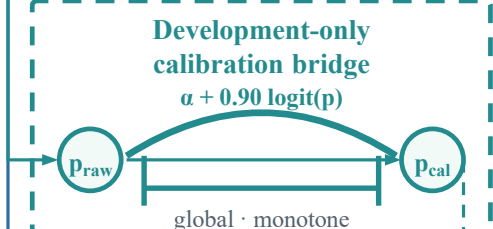

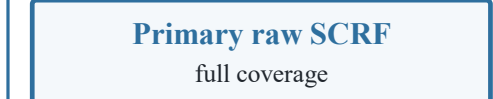

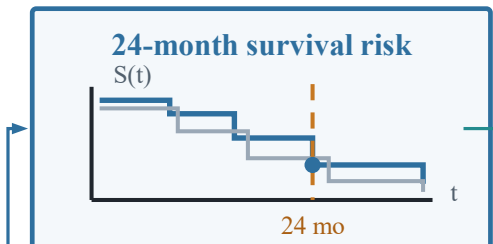

## c Nested shrinkage control

### Joint training objective

## d Governed prediction paths

primary raw-SCRF path

optional evidence pathway

exact CAM fallback

⊕ addition · × shrinkage ·  $M_i$  usable modality set
